PROFESSIONAL SUMMARY

Early-career Software and AI Professional with hands-on internship experience in developing LLM-powered applications using LangChain, LangGraph, FastAPI, OpenAI API, and MongoDB. Skilled in Retrieval-Augmented Generation (RAG), AI agents, REST API development, full-stack application development, Machine Learning, Natural Language Processing (NLP), and scalable backend systems.

TECHNICAL SKILLS

- Programming: Python, JavaScript, SQL
- AI/ML: LangChain, LangGraph, OpenAI API, RAG, Prompt Engineering, AI Agents, NLP, Scikit-learn, XGBoost
- Backend: FastAPI, REST API, MongoDB, Qdrant
- Frontend: React.js, HTML, CSS
- Tools: Git, GitHub, Jupyter Notebook, Google Colab, Kissflow

EXPERIENCE

Nitroware Technologies | April 2025 – May 2025

Project: Sentiment Analysis of IMDb Movie Reviews

Role: ML Engineer Intern

Inouora Technologies | December 2025 – February 2026

Role: LiDAR Data Specialist Intern

The Yellow Network | April 2026 – June 2026

Projects: Sales Intelligence AI,
EV Fleet Management

Role: Software Developer, AI Automation Developer

PROJECTS

AI Sales Intelligence Platform

- **Tech Stack:** Python, React.js, Django, FastAPI, MongoDB, LangChain, LangGraph, OpenAI API, Qdrant, Tailwind CSS, REST APIs
- Developed an AI-powered Sales Intelligence platform using LangChain and LangGraph.
- Built a Retrieval-Augmented Generation (RAG) pipeline with document ingestion, indexing, and semantic search.
- Integrated OpenAI API, MongoDB, and Qdrant for enterprise knowledge retrieval.
- Designed AI agent workflows and REST APIs to automate business insights and sales intelligence.

EV Fleet Management System

- **Tech Stack:** Spring Boot, Java, JWT, REST APIs, AI Services, RAG, Geolocation APIs
- Developed an AI-powered EV Fleet Management platform for vehicle operations and complaint management.
- Implemented JWT-based authentication and role-based access control (RBAC).
- Integrated RAG-based AI workflows for intelligent complaint analysis.
- Built scalable REST APIs and geolocation-based vendor assignment workflows.

Sentiment Analysis of IMDb Movie Reviews

- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, NLTK
- Built an NLP-based sentiment analysis model for IMDb movie reviews.
- Performed text preprocessing, TF-IDF vectorization, and feature engineering.
- Trained and evaluated XGBoost and MLP Classifier models using standard evaluation metrics.
- Improved classification accuracy through preprocessing and model optimization.

Airline Reservation System

- **Tech Stack:** VB.NET, SQL, XAMPP
- Developed a database-driven airline reservation system for booking and reservation management.
- Designed relational database schemas for passengers, flights, and tickets.
- Implemented booking, cancellation, and reservation modules.
- Optimized SQL queries to improve application performance and data consistency.

AI-Powered VR Museum

- **Tech Stack:** Unity 3D, C#, Virtual Reality (VR), OpenAI API, REST APIs
- Developed an AI-powered Virtual Reality Museum using Unity 3D.
- Integrated OpenAI API to provide intelligent explanations for museum artifacts.
- Designed interactive 3D environments with real-time exhibit navigation.
- Implemented REST API integration for dynamic AI-powered interactions.

EDUCATION

Bachelor of Science in Computer Science (Artificial Intelligence)

PSGR Krishnammal College for Women **2023 – 2026** | CGPA: 8.46

Higher Secondary (Class XII)

St. Joseph's Matriculation Higher Secondary School | **2021 – 2022** | **86.8%**

Secondary School (Class X)

St. Francis Anglo Indian Girls High School | **2019 – 2020**

CERTIFICATIONS

- Building Generative AI-Powered Applications with Python
- Generative AI: Introduction & Applications
- Introduction to Artificial Intelligence
- Microsoft Power BI
- Database Management System (NPTEL)
- Software Testing (NPTEL)

AREAS OF INTEREST

Artificial Intelligence • Software Development • Machine Learning • Data Science • Data Analytics • Large Language Models
• AI Agents • Backend Engineering
